

BANK 4 – *Bonus programs that have been developed through the workshop calendar!*

Harmonic Tremolo

- I : Filter cutoff
- II : Tremolo rate
- III : Tremolo depth

Pitch shifter delay

- I : Delay time
  - II : Pitch shift amount from -1 to +1 octave
  - III : Clean / shift mix for delayed signa.
- Use FEED for repeats*

Delay with random quantized arpeggiator

- I : Delay time
  - II : Arpeggio rate
  - III : Arpeggio transition softness (glissando)
- Use FEED for repeats*

Multihead delay

- I : Delay time
- II : Repeats (does not function the same as FEED knob)
- III : Delay head config : [4] , [1+4] , [2+4] , [3+4] , [1+2+3+4]. Heads are evenly spaced.

Random tremolo

- I : Tremolo rate
- II : Modulation curve softness
- III : Randomness amount

Dual head delay

- I : Delay time
- II : Delay head emphasis mix
- III : Delay head position scale/ratio

Quantized pitch shifter delay

- I : Pitch shifting amount. Quantized into halftone steps
- II : Delay time
- III : *No function*

Harmonic tremolo delay

- I : Delay time
- II : Tremolo rate
- III : Tremolo depth
